FULL STACK DEVELOPER

I'm a web developer who loves building fast, interactive, and user-friendly web apps. I work across the full stack using tools like Next.js, Express, Supabase, Firebase, Redis, Prisma, SQL, and MongoDB. I also enjoy working with GraphQL for flexible and efficient data fetching.

I'm passionate about solving complex problems with simple, elegant solutions—whether that's crafting a smooth user interface or building a solid backend. I'm always eager to learn, collaborate, and create things that work beautifully.

SKILLS

Next.js	Mongo DB	Typescript	ExpressJs	Render (Backend Deployment)
Tailwind CSS	React Js	JavaScript	GraphQL	Vercel (Frontend Deployment)
Prisma ORM	Supabase	Java	Firebase	Docker

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern
Scripters Hub

July 2024 - Nov 2024

- Gained hands-on experience in full stack development while contributing to real-world projects under the guidance of senior developers.
- Learned and worked with modern web technologies including JavaScript, React, and Node.js.
- Assisted in the development and testing of internal tools and applications, improving basic understanding of frontend and backend workflows.
- Participated in daily team meetings, sprint reviews, and code walkthroughs to better understand agile development processes.
- Strengthened problem-solving and debugging skills through mentorship and peer collaboration.

Full Stack Developer (Full Time)
Scripters Hub

Nov 2024 - Present

- Developing and maintaining core product features using Next.js, TypeScript, MongoDB, Redis, and Firebase.
- Building scalable and responsive web applications with Tailwind CSS, ensuring performance and a seamless user experience.
- Leading implementation of backend services, data modeling, and API integrations to support complex business logic.
- Collaborating closely with product managers, designers, and other developers to deliver high-quality solutions on schedule.
- Continuously optimizing the development process and application performance using modern best practices and tools.

Upwork

June 2024 - Present

Database Application Developer and UML Modeling

- Developed custom database solutions using MongoDB and SQL to meet client needs.
 - Designed scalable database architectures and optimized performance.
 - Collaborated with clients to translate business requirements into efficient data models.
 - Provided ongoing support, troubleshooting, and enhancements to ensure high-quality results.
-

EDUCATION

Bachelor's in Software Engineering

Karachi University

(January 2022 - 2025)
